We have a file transfer protocol (FTP) system on our website to exchange files with our clients. Foreign Account Tax Compliance Act (FATCA):

With the globalization of the economy, more and more people in the U.S. have foreign financial accounts. While there are many legitimate reasons to own foreign financial accounts, there are also responsibilities that go along with owning such accounts. Foreign account owners must remember that they may have to report their accounts to the government, even if the accounts do not generate any taxable income.

In addition, the IRS also requires information reporting and the respective IRS tax forms are due when your income tax return is due, including extensions. Therefore, if you fall into one of the below categories, or if you have any direct or indirect foreign interests, you may be required to file applicable IRS forms. **The IRS has very significant penalties for failure to file the required forms, many which start at \$10,000.**
